

SL-C Model (f/k/a KSL)

sealock 

High Security, Low Profile

Tamper-evident intelligent design in a cost-effective lightweight package, the SL-C functions like a traditional Sealock in streamlined cable seal form. The SL-C protects against covert attacks like its stronger siblings, while still exceeding CTPAT standards for High Security (H) seals. All in 1 compact device.

Innovative products. Continuous commitment to delivering step-ahead container security solutions. Sealock—The Only Seal That Locks, The Only Lock That Seals.
